

JUST LISTED CAMPAIGNS

Win more listings. Without the guesswork.

AdPropix creates a compounding pipeline from every sale and appraisal, keeping you visible to homeowners likely to list next. It demonstrates to sellers that you are active in their market, establishing your brand as a recognized name among local vendors.

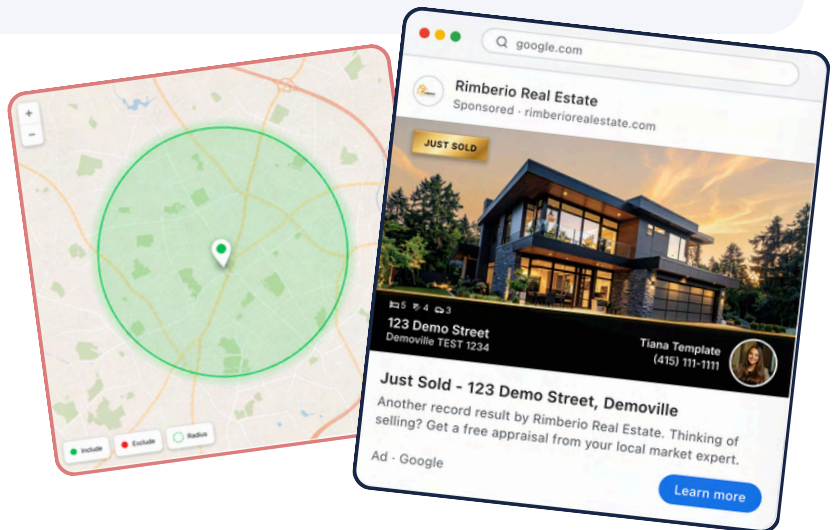

A win for the vendor. A win for you.

Your vendor wins a stronger buyer pool, more competition and a better sale price. You win the proof a future seller needs to choose you. Every campaign you run becomes the marketing for the listing after it - the flywheel that turns one sold sign into the next.

THE STAND-OUT SOLUTION

Control who sees your ads, down to the street.

Most ad platforms let you target a suburb. AdPropix lets you draw a radius around your most recent sold listing, layer it over the postcodes you farm, and reach the homeowners actively searching for an agent right now - at the exact moment that search is happening.

More listings

Stay top-of-mind with the homeowners who are weeks away from picking an agent.

Stronger sale results

Build buyer demand on your active listings so vendors get the result they were promised.

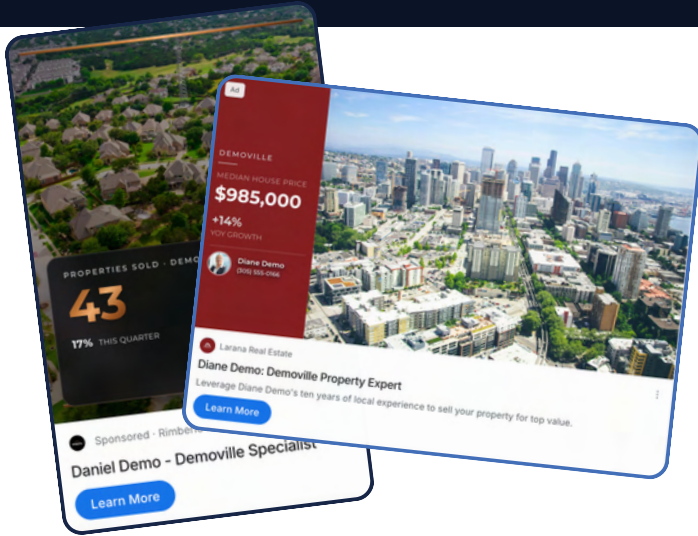

Trusted local brand

Become the agent the suburb sees everywhere, week after week, without lifting a finger.

TWO BRAND CAMPAIGNS. ONE GROWTH ENGINE.

Designed to secure future listings.

While Property Campaigns focus on current listings, Brand Campaigns promote your name and results to potential future vendors, ensuring you remain top-of-mind during important discussions.

Agent Authority

Position yourself as the local market expert so homeowners trust you **before they meet you.**

- Median prices, days on market, demand trends.
- Targeted at the people researching and deciding whether to sell.
- Authority compounds. By the time a vendor calls three agents, you're already the name they know.

Vendor Trust

Show future vendors **the proof they need** - your results, your reviews, your record - right when they're choosing.

- Real client stories and sold-price wins, designed and published as polished ads with zero design work.
- Showcase the trust signals that win the listing presentation before it starts.
- Reach homeowners through the long decision window between 'thinking about selling' and signing.
